CAREER READY PA BACKPACK CHALLENGE

Career Ready PA is excited to provide a seamless opportunity for students to obtain artifacts for their career portfolio by participating in Remake Learning Days events tagged with a “backpack.”

Festival Partners:

The Remake Learning Days festival takes place across Pennsylvania between May 2-22, 2024. A variety of organizations showcase host free events for all age groups and provide hands-on learning opportunities. Participating organizations include libraries, schools, tech centers, museums, play spaces, community centers and more.

Did you know that 91% of STEM jobs in Pennsylvania will require some form of a postsecondary credential? Participating in hands-on learning is one way to learn STEM and employability skills. The STEM career tree has many branches, and you may explore one at the Remake Learning Days festival.

Did you ever think that creating an invention, learning to code, or planting a garden builds employability skills? Activities like learning how to fly a drone, marketing a product, and helping your community is a foundation to your future career pathway!

Events listed under Career Ready PA qualify for the Career Ready PA Backpack Challenge. Students who participate will earn a Career Ready PA Backpack Challenge badge. Career Ready PA will also award a banner to schools with up to 100 artifacts.

When students finish the event, they will need to complete the artifact survey on the Career Ready PA Backpack Challenge page. This survey will be shared with your school so you can earn your badge and get career portfolio credit for the Backpack Challenge!

Look for RLD events with this backpack symbol to earn a career readiness badge as part of the Career Ready PA Backpack Challenge. To participate, follow the steps at: <https://remakelearningdays.org/pa-career-ready>

Regional Lead:

LEARNING THEMES

To help navigate all the events, below are helpful learning themes. Please note that some events may feature a primary theme and several secondary themes.

What is STEAM? STEAM stands for science, technology, engineering, arts, and mathematics. Learning these subjects together (rather than independently) helps students encourages creativity, critical thinking and collaboration.

ARTS is hands-on learning and expression through all kinds of art: theatre, dance, visual art, music, photography, and more!

MAKER "Making" is about taking things apart and putting it back together. Tinker, build, and create with all kinds of materials. Try a 3D printer, take apart a toy to see what's inside and then rebuild it, or create a marshmallow tower!

OUTDOOR LEARNING is about experiencing and learning about the natural world. How can we think about the environment, sustainability, and more by exploring our very own backyards?

SCIENCE is all about experimentation! Kids and adults can explore chemistry, biology, geography and more. How does our world work? What can we test and explore in the world around us?

TECHNOLOGY gives kids the chance to explore their digital world. Want to try coding? Build robots? Learn circuitry? Look for technology events that help you discover new things.

YOUTH VOICE is about youth leadership and amplifying youth voice. Youth have the ability to express themselves in so many ways such as: through audio, video, art, music, and more.

PROFESSIONAL DEVELOPMENT

For traditional and non-traditional educators, various organizations offer credited and non-credited professional development featuring STEAM-inspired learning.

ACROSS THE WORLD

Remake Learning Days is taking root across 16 regions in 2024, including international regions in United Kingdom, Uruguay and New Zealand!

The growth of Remake Learning Days is in response to a desire for more real-world learning experiences that prepare youth from all backgrounds and all neighborhoods for our rapidly changing world.

From April through May, there will be approximately 2,000+ events held in spaces such as parks, libraries, STEM labs, maker-spaces, museums, tech companies, laundromats and more. Families can participate in learning everywhere! We hope to create a genuine movement of educators, parents, and students and ignite a global conversation around the future of learning and increase the demand for engaging and equitable hands-on experiences across all the spaces kids learn.

EDUCATORS:

Remake Learning is a free, peer network for educators and innovators that originated in Pittsburgh and now extends worldwide. The network helps connect people, projects, and organizations, making it easier for them to share best practices, collaborate on new ideas, and find funding and professional learning. In 2022, Remake Learning celebrated its 15th anniversary with members and friends from across the region, country, and world. Learn more at remakelearning.org.
